

Inverting Maslow's Hierarchy of needs

There are two instances where Lieberman uses then lightly refutes Maslow's Hierarchy of needs. Pg. 41- 42. Infants use social connection to get Physiological needs met by their care givers.

Lieberman simultaneously uses Gaipa's Piggybacking technique as well as leap frogging.

Lieberman's assessment of Primary reinforcers and secondary reinforcers he uses Maslow's theory as a spring board.
